

Pranav Kumar Singh

+91 8564048146 pranavmarch20@gmail.com pranavmarch20 pranavmarch20

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, Go, SQL

Backend: Node.js, Express.js, REST APIs, Bun, Prisma, Zod, Authentication & Authorization

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Shadcn UI, HTML, CSS, Bootstrap

Databases & Backend Services: PostgreSQL, MongoDB, Redis, Convex, Generative AI APIs, Prompt Engineering

Cloud & DevOps: AWS (EC2, S3, Lambda, DynamoDB, VPC, IAM), Docker, GitHub Actions (CI/CD), Linux

Testing & Developer Tools: Git, GitHub, Postman, Visual Studio Code, Jest, React Testing Library, ImageKit

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile/Scrum

Projects

Talent IQ – Real-Time Interview Platform

[Github](#)

- Built a real-time interview platform with WebRTC video, live collaborative coding, and multi-language code execution.
- Implemented event-driven background pipelines using **Inngest** to process and log candidate evaluation data asynchronously.
- Secured 1-on-1 sessions via **Clerk** and optimized dashboard state management using **TanStack Query** to reduce API latency.
- Technologies:** *React, Node.js, Express, Stream API, Clerk, TanStack Query, Inngest*

24hrCloud.io – Serverless Cloud File Sharing Platform

[Github](#)

- Engineered a serverless file-sharing platform on **AWS** using **S3, Lambda (Node.js), API Gateway, and DynamoDB**, serving static assets via **CloudFront** CDN.
- Architected a high-throughput, direct-to-S3 upload pipeline using short-lived **S3 Pre-signed URLs**, bypassing backend API size limits and reducing compute processing overhead.
- Built an event-driven auto-cleanup pipeline utilizing **DynamoDB TTL and Streams** to trigger a asynchronous **Cleanup Lambda**, purging expired physical S3 objects after 24 hours.
- Implemented granular, least-privilege security policies via **AWS IAM** and client-side session storage for isolated workspace access control without stateful backend sessions.
- Technologies:** *AWS (Lambda, S3, DynamoDB, API Gateway, CloudFront, IAM), Node.js, JavaScript, Tailwind CSS*

Eventify – Local Event Ticketing Platform

[Github](#)

- Engineered a full-stack MERN platform for local events featuring QR ticket generation & real-time attendance validation.
- Designed transactional **MongoDB** schemas to maintain data consistency during concurrent booking and ticket updates.
- Built secure RESTful APIs in **Node.js/Express** using **JWT** for role-based access across attendee and organizer dashboards.
- Integrated **ImageKit** pipelines to automate cloud image optimization and asset storage, reducing media transfer latency.
- Technologies:** *React.js, Node.js, Express.js, MongoDB, JWT, ImageKit API, REST APIs, Tailwind CSS*

Achievements

- Secured **3rd** position in Kalpathon (**Hackathon**) in Akhil Jyot'25 of BBDU, Lucknow.
- Top 5** in InnVedX Hackathon held at Utkarsh event, BBD University and also got qualified for Finals of Lucknow MULTI-CITY in Hack-a-Skill: Powered by Techskillogy and Celesta' 2025 of IIT Patna.
- Selected as a Contributor for **GirlScript Summer of Code (GSSoC) 2026**, contributing to open-source initiatives.
- Solved **400+** coding problems across LeetCode, Codeforces, and GFG. ([Link](#))
- Secured ranks **237** and **339** in CodeChef weekly contests with 2* (Max. Rating: **1448**) ([Link](#))
- AWS Cloud & DevOps Training (90 Hrs):** Hands-on experience configuring AWS infrastructure (EC2, VPC, S3, IAM, RDS), Linux administration, automation scripts, and ci/cd deployment pipelines. ([Link](#))

Education

Babu Banarasi Das University

B.Tech in Computer Science and Engineering (CGPA: 7.94 till 6th Sem)

2023 - Present

Lucknow, India

Army Public School, Nehru Road

Central Board of Secondary Education (Class XII)- 84.20%

2021 - 2022

Lucknow, India

Army Public School, Nehru Road

Central Board of Secondary Education (Class X)- 86.40%

2019 - 2020

Lucknow, India
